MONEY MANAGER

A Complete Home
Finance Package

Money Manager is a complete home finance package. It enables you to keep a check on every aspect of your finances, from your salary and mortgage to the family allowance.

The program supplies a list of suggested file headings which you either use as they are, or tailor to fit your personal accounts. Once you have entered the details of your finances, the 64 does everything for you. It will update your regular payments month by month, remind you which bills remain unpaid, and provide you with a forecast of next month's or next year's expenditure, based on the rate at which inflation is running.

There's a facility to transfer your savings from your current to your savings account (or vice versa). The computer will calculate the regular payment which you need to make to a budget account — and then adjust your accounts every month when the payment is made.

As far as security goes, there's no need to worry. When you save your files, a special password is requested — and no one can look at your program without knowing your password. On top of all this, you have the satisfaction of being able to check up on the state of all your accounts at any time you want.
